*Lunch will be provided for all registered attendees.*

2<sup>nd</sup> Annual

# Concrete Spring Symposium

Hosted by

The Intermountain Chapter of The American Concrete Institute

# 2<sup>nd</sup> Annual Concrete Spring Symposium Friday, March 26<sup>th</sup> 2010

The Intermountain Chapter and University of Utah Student Chapter of the American Concrete Institute are hosting an all day symposium.

This year's topics will address issues associated with achieving fine finishes and precise tolerances of concrete. ACI 117, ACI 318, and ACI 301 will be covered specifically.

This symposium is dedicated to giving attendees the knowledge and skills needed in today's competitive market.

In addition to earning professional development hours or continuing education units, a delicious lunch will be served to attendees.

**"Some minds are like concrete, all mixed up and permanently set."**

## Symposium Speakers

### Scott Anderson

Mr. Scott Anderson is the Vice-President of Keystone Structural Concrete in Houston, TX. He has 17 years of construction experience in the roles of manager and engineer.

### Steve Morriscal

Mr. Steve Morriscal is the Senior Technical Service Engineer of Holcim (US) Inc., and Chair of ACI 306 Cold Weather Concreting.

### Rod Higley

Mr. Higley works in the ready mixed concrete division of Staker Parson Companies. He has extensive knowledge of concrete including new types of concrete being used in architectural components.

### Jerry Hall

Mr. Jerry Hall is a senior concrete engineer for Geneva Rock/Clyde Companies. Mr. Hall brings years of experience and knowledge to the concrete industry.

### Ramon Carrasquillo

Dr. Carrasquillo has been considered an excellent educator and leading researcher in the area of construction materials for over 25 years. Dr. Carrasquillo's has over 10 year experience as founder and owner of a concrete materials supply company in Austin, Texas.
